

STAY HAIRFREE – Embrace Your Smooth Skin

Love smooth skin but wish
you didn't have to remove
hair so often?

SKIN CARE SYSTEM

The Ultimate System for lasting smoothness

- ✓ Less hairs, longer-lasting smoothness
- ✓ Gentle on skin – fewer irritations
- ✓ Saves time, money & discomfort
- ✓ Ideal after waxing or sugaring for visibly better results

Hair removal that never seems to last?

Many hair removal methods are frustrating:

- Hair grows back too quickly
- Irritations, redness, ingrown hairs
- Pain-sensitive skin
- Laser? Too expensive or too risky?

You deserve a better solution – to feel hair-free and confident in your skin.

THE SOLUTION:

STAY HAIRFREE – the natural way to reduce hair growth

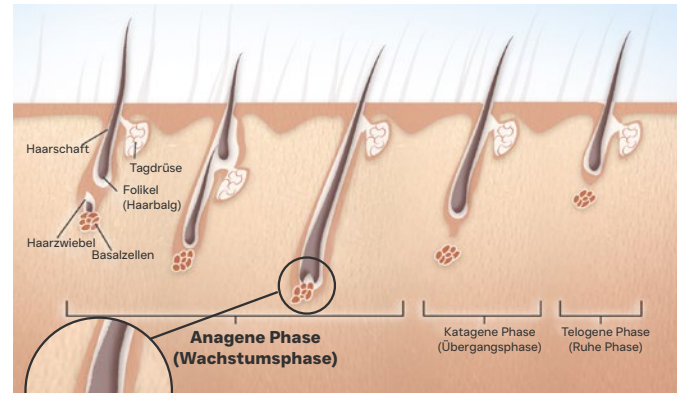

The STAY HAIRFREE Enzyme-DUO is a unique 2-phase care system applied directly after each waxing or sugaring session.

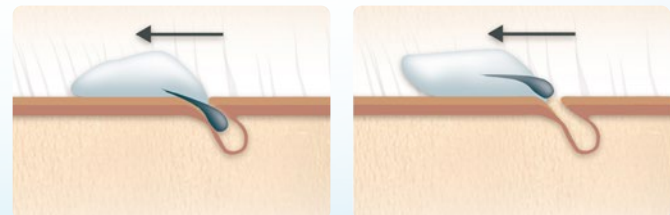

Phase 1: KILLER ENZYMES Phase 2: HUGS & KISSES

Work together through the empty hair follicle to reduce growth signals and cells in the hair root – while also calming and nourishing stressed skin.

With every application, hair regrowth becomes visibly less – naturally, gently, and without laser.

This is where STAY HAIRFREE works enzymatically – without heat – on the previously exposed hair follicle...

Waxing or sugaring ensure the follicle is free of hair

Your mindful skin ritual – smooth, cared for & regenerated

Support your in-studio results with the STAY HAIRFREE Skin Care System – or use it independently for sensitive, dry, or blemish-prone skin.

SOS PURIFY

Spot-on serum for ingrown hairs & irritated, blemished skin

SUGAR SCRUB

Gentle sugar exfoliation for renewed, radiant skin

SOOTHING BODY OIL

Vitamin-rich care for face & body – regenerates, calms, balances & protects

Use regularly to maintain smooth, healthy skin and extend the results of each treatment.

ONE System – ALL the benefits
