SUGARING & CARE *skin*

Professional results start with expert consultation

Use our structured consultation card to guide meaningful client dialogue, design custom treatment plans, and build loyalty through clear results and transparent pricing.

Learn how in the Sugaring Academy – your path to consultation mastery!

Prep like a pro – with our “Let’s Get Started Right” Foam Cleanser.

Designed to gently cleanse and condition skin and hair before epilation, it optimizes both comfort and efficiency – while creating the perfect base for the Enzyme-DUO to perform at its best!

- ✓ Mild, skin-friendly formula with gentle sugar-based surfactants (Decyl Glucoside)
- ✓ Effectively removes oils, sweat & residues – without drying the skin
- ✓ Supports the skin’s natural pH balance thanks to lactic acid
- ✓ Ideal prep for epilation – improves adhesion & comfort with sugar or wax
- ✓ Fragrance-free & sulfate-free – perfect for sensitive zones
- ✓ Boosts the performance of the Enzyme-DUO by ensuring optimal skin surface

Epilation at its best – with modern sugaring pastes.

Upgrade your results with our next-generation, low-viscosity 4-element sugar pastes – developed for flexibility, precision, and performance. Tailored to adapt to any season, skin or hair type, and designed to support even the most advanced sugaring techniques.

FIRE Sugar Paste

A high-viscosity sugar paste with a firmer texture. Often used as a “starter paste,” it reduces the risk of sticking to the skin – especially helpful in warm, humid environments or when strong perspiration occurs. Also used to thicken softer pastes like OCEAN or EARTH.

EARTH Sugar Paste

A medium-viscosity paste recommended for all areas with high perspiration, such as underarms and bikini zone. Suitable for beginners and professionals alike, it can be used on its own or blended with softer pastes like OCEAN or MASTER-AIR.

OCEAN Sugar Paste

A pleasant, light-viscosity paste and the perfect all-rounder for most body areas – including bikini zone, underarms, and face. Also suited for fine or short hairs. Can also be used to soften thicker pastes like FIRE or EARTH.

MASTER-AIR Sugar Paste

This paste excels with its silky, low-viscosity texture. It’s the preferred choice for advanced sugaring techniques on all body zones – offering maximum comfort with minimal paste consumption. Especially well-suited for fine or short hairs.

SUGARFLUID

The SUGARFLUID is the ideal addition for experts who want to precisely adjust the viscosity of their sugar pastes. It allows you to achieve the perfect consistency for smoother, more efficient sugaring – while reducing material usage.

Higher profit margins with the Master Sugar Pastes

The myhairfree skin sugar pastes are **significantly more economical in use and noticeably more comfortable** for both practitioners and clients compared to conventional products.

Master-level efficiency with only 45–60 g per full-body treatment

Supported by fluid-viscous paste textures and advanced technique – for better control, smoother results, and less waste.

Application-example: Amount of Sugarpaste used for one full-body hair removal*

120-180g!

- ✗ High consumption
- ✗ Need paste change

80-120g!

- ✓ Lower consumption
- ✓ Reduced paste change

45-60g!

- ✓ Minimal consumption
- ✓ No paste change

*Sugaring of lower legs, Armpits and Intimate area on woman + aftercare with the Stay Hairfree Enzyme-DUO.

Embrace your smooth Skin

- ✓ Expand your services with long-term sustainable hair reduction!
